

.NET Foundation

<http://www.dotnetfoundation.org/>

.NET wird OpenSource

.NET Compiler Platform ("Roslyn")	.NET Core 5
.NET Micro Framework	.NET SDK For Hadoop
ASP.NET 5	ASP.NET Ajax Control Toolkit
ASP.NET MVC, Web API and Web Pages (Razor)	ASP.NET SignalR
Cecil	Couchbase Lite for .NET
Entity Framework 6	Kudu
MailKit	Managed Extensibility Framework (MEF, MEF2)
Microsoft Azure SDK for .NET	Microsoft Web Protection Library
Mimekit	MVVM Light Toolkit
NuGet	Open XML SDK
Orchard CMS	Orleans
OWIN Authentication Middleware (Katana Project)	Salesforce Toolkits for .NET
System.Drawing (Mono)	Thinkecture.IdentityManager
Thinkecture.IdentityServer	Umbraco
Windows Phone Toolkit	Xamarin.Auth
Xamarin.Mobile	

.NET Core 5

- .NET Core 5 Framework
 - => `corefx`
- .NET Core 5 Common Language Runtime
 - => `coreclr`

.NET Compiler Platform (“Roslyn”)

- Irgendwas muss man ja haben, um .NET auf den Plattformen kompilieren zu können...

Summary

- Der Schritt war nur logisch, um .NET auf allen Plattformen bereitstellen zu können..
- “...Take .NET to the next Level...” Scott Gu (Build 2014)
